## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. A telephone call was made to applicant's representative on 10/9/2003, notifying applicant that a restriction requirement was being made; no election was made at the time.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5,7-15,17,18,20,21,24-27,29-40,45,46,49-52,55,58-60, drawn to a multipass speech recognition system with thresholds, classified in class 704, subclass 236.
  - II. Claims 6,22,23,28,47, and 48, drawn to silence/speech decision, classified in class 704, subclass 215.
  - III. Claims 16,19,41,44,53,54,56,and 57, drawn to speaker type recognition, classified in class 704, subclass 246.
3. The inventions are distinct, each from the other because of the following reasons:

412  
413

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not need silence/speech decision to perform doublepass generic speech recognition decision via thresholds. The subcombination has separate utility such as performing silence/speech decisions.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not need gender based descriptors to perform doublepass generic speech recognition decisions via thresholds. The subcombination has separate utility such as performing voice recognition based on the type of speaker.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as silence/speech discrimination as opposed to speaker classification based on gender. See MPEP § 806.05(d).

Art Unit: 2655

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
